

Custom Size 5-String Violin, 2009

The violin is slightly larger in width, length and arching than a typical violin. The ribs are also slightly deeper - all in an effort to balance the scale better for the lower "C" string while maintaining a good balance among the other four strings. The back is one-piece; the top is two piece Englemann Spruce. Back, neck and sides are of Eastern European Maple. The violin has a deep rich sound - darker and more mellow than you would get from a standard size violin. Quick response and even tone.

Body length: 361 mm	Rib depth: 32mm (top) Rib depth: 33.5mm (bottom)
Upper bout: 178 mm	Arch height (belly): 17.5 mm
Middle bout: 118 mm	Fingerboard width at nut: 28 mm
Lower bout: 215 mm	String length: 329 mm
